IGH Seminar Series of the Department Genetics, Cell biology and Development

April - October 2022

INSTITUT DE GENETIQUE HUMAINE Genopolys Amphitheater

Friday April 29 at 11:30

Jérôme Cavaillé, Centre de Biologie Intégrative, Toulouse

Box C/D small RNA-guided post-transcriptional modification of cellular RNAs

(Contact: Hervé Seitz)

Friday May 13 at 11:30

José Juan Rubio-Lopez, Laboratory of Pathogen-Host Interactions, University of Montpellier

Novel players in virulence gene regulation in Plasmodium falciparum

(Contact: Kazufumi Mochizuki)

Friday June 3 at 11:30

Lucas Neukomm, Department of Fundamental Neurosciences, University of Lausanne,

Switzerland

Hijacked NAD+ metabolism during axon degeneration in Drosophila

(Contact : Jean-Maurice Dura)

Friday June 17 at 11:30

Michel Steinmetz, Paul Scherrer Institute, Villigen, Switzerland

Writing, reading, and erasing tubulin tyrosination

(Contact: Krzysztof Rogowski)

Friday July 8 at 11:30 *

Serge Nef, Genetic Medicine and Development, University of Geneva, Switzerland

Identification of a novel and rare somatic lineage in the developing mouse gonad

* IGH Seminar Room, 1st floor (Contact: Francis Poulat)

Friday September 23 at 11:30

Simon Alberti, Biotechnology Center, TU Dresden, Germany

Biomolecular condensates as an organising principle in biology and disease

(Contact: Martine Simonelig)

Friday October 7 at 11:30

Marvin Tanenbaum, Hubrecht Institute, Utrecht, The Netherlands

Heterogeneity in mRNA decoding

(Contact: Edouard Bertrand)

2022
