

INSTITUT DE GENETIQUE HUMAINE
Genopolys Amphitheater

Monday February 19 at 11:30

Daniel R. Larson, NIH, Bethesda, USA

The spliceosome in health and disease

(Contact: Edouard Bertrand)

Friday March 1 at 11:30

Dario Lupianez, Centro Andaluz de Biología del Desarrollo, Sevilla, Spain

Genomes in 3D: implications for development and evolution

(Contact: Francis Poulat)

Friday March 8 at 11:30

Zoher Gueroui, Chemistry Department, ENS, Paris, France

Engineering phase separation in cells to manipulate biomolecular condensates

(Contact: Martine Simonelig)

Friday March 15 at 11:30

Frédéric Delsuc, Institut des Sciences de l'Evolution de Montpellier (ISEM), France

Phylogenomics and the mammalian tree

(Contact: Hervé Seitz)

Friday June 14 at 11:30

Sonia Garel, IBENS, ENS, Paris, France

Immune cells in the choreography of cerebral development

(Contact: Ana Boulanger, Jean-Maurice Dura)

Friday June 28 at 11:30

Thomas Surrey, CRG, Barcelona, Spain

In vitro reconstitutions reveal mechanisms of microtubule nucleation and organization during mitosis

(Contact: Krzysztof Rogowski)

Friday November 15 at 11:30

Omayya Dudin, EPFL, Lausanne, Switzerland

Ichthyosporeans and the evolution of animal embryogenesis

(Contact: Kazufumi Mochizuki)
